TRENCHING BUCKETS**

CRAIGTM

EXB-HD / EXB-XHD / EXB-SS TRENCHING BUCKETS

FEATURES AND BENEFITS

Built to work for specific applications, Craig Excavator Trenching Buckets are available in three different classifications for all your job site digging needs.

HEAVY DUTY

Heavy Duty Buckets are designed for medium abrasion, medium impact job sites. Recommended for digging in common digging applications.

EXTRA HEAVY DUTY

Extra Heavy Duty Buckets are designed for high abrasion, medium impact job sites. Recommended for digging in tough soil conditions.

SEVERE SERVICE

Severe Service Buckets are designed for high abrasion, high impact job sites. Recommended for the toughest digging conditions. Custom configurations available to meet your specific tough job site needs.

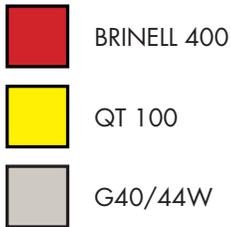

HOOK-UP

Available with a variety of hook-ups including Wedge Lock, Pin-on, S Series, and Manual Bar Lock lugging. Vertical wall lugging also available in most hook-up styles – ideal for digging near basement walls where the bottom of the bucket needs to be parallel with the wall for optimal digging.

WEAR PLATE AND BUCKET APPLICATIONS

EXB-HD

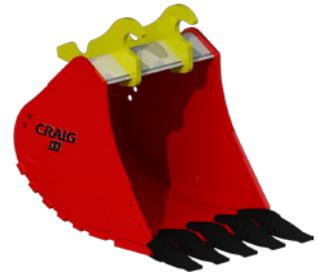

- Top soil
- Loam
- Coal
- Well Shot Limestone

EXB-XHD

- High Silica Sand
- Shot Granite
- Caliche
- Broken Slag
- Sandstone
- High Quartzite Granite
- Ore

SIDECUTTER PROFILE

Craig trenching buckets are available with two different sidecutter profiles for your specific application. Our standard sidecutter comes pre-drilled for bolt-on sidecutters and features a gradual curve for your everyday trenching needs. The quick fill style sidecutter features a weld-in sidecutter as standard and offers an aggressive curve that promotes faster bucket filling in trenching applications.

Standard and quick fill style sidecutters available.

OPTIONS

- Customizable width and capacity
- Wide variety of aftermarket and OEM teeth and adapters
- Burp holes or no burp holes
- Bolt-on sidecutters or wear shrouds
- Heel shrouds
- Craig designed armour package
- Vertical wall lugging
- Weld-on half arrow base edge protection
